

This architectural floor plan depicts a hospital ward with a variety of functional spaces. The layout is organized into several distinct areas:

- Entrance and Reception:** The main entrance (ENTRÉ/VINGÅNG) leads into a reception area (RECEPTION) and a waiting area (VÄNTSAL) equipped with multiple chairs.
- Administrative and Support Spaces:** These include an administrative office (ADMINISTRATIVT RUM), a storage room (FÖRVARING), a linen closet (LINNEN), and a kitchen (KÖK).
- Treatment and Examination Rooms:** The ward contains several treatment rooms (BEHANDLINGSRUM) of varying sizes, some with examination tables and others with beds. There are also specialized rooms for X-ray (RÖNTGEN) and infection treatment (BEHANDLINGSRUM INFEKTION).
- Rest and Recovery Areas:** A large lounge area (LOUNGEN) with sofas and armchairs provides a space for patients and visitors. There are also private rooms (PRIVATNING/LAB) and a dedicated rest room (RÖSTRUM).
- Sanitary and Support Facilities:** The plan includes multiple restrooms (WC), a shower room (DUSKA), and a laundry room (VASKERUM).

Each room is meticulously detailed with furniture, equipment, and room numbers, along with their respective areas in square meters.
